Profile

Motivated Computer Science enthusiast with a passion for both front-end and back-end development, seeking opportunities to leverage academic knowledge and hands-on experience in software engineering. Adept at combining strong problem-solving skills with technical expertise in programming languages including Java, C++, and HTML to build efficient and scalable applications.

Education

University of the people Apr 2023 - Present
California

As a third-year Computer Science student, I am highly motivated and detail-oriented, with a solid foundation in computer skills, programming fundamentals, and innovative problem-solving. Passionate about front-end development and eager to apply technical knowledge in real-world projects. My academic background in Computer Science has provided me with a solid understanding of algorithms, data structures, and software development principles. I am particularly interested in backend development, database design, and building scalable systems that solve real-world problems. Through hands-on projects and coursework, I have developed strong analytical thinking and coding skills using languages such as Html, Java, and C++.

Salam University Jan 2023 - Jun 2025
Kabul

I have over two and a half years of academic Arabic language study at Salam University, including five months of intensive grammar (Sarf and Nahw) training. In addition to my academic background, I also have experience teaching Arabic, which has strengthened my communication and instructional skills. Committed to continuous learning, teamwork, and contributing positively to innovative tech environments.

Courses

W3school

Present

I regularly use W3Schools as a practical resource to reinforce my programming knowledge and practice web development skills. It has helped me improve in HTML, CSS, JavaScript, and backend technologies through hands-on examples and interactive coding. W3Schools supports my learning by offering clear, beginner-friendly explanations that complement my formal studies.

Coursera

Present

I actively take programming courses on Coursera to strengthen my technical skills and stay updated with current industry practices. These courses have helped me deepen my understanding of topics such as object-oriented programming, data structures, and web development. Learning through Coursera has also improved my self-discipline, time management, and ability to learn independently.
